SUMMARY

I'm a web developer passionate about creating responsive and user-friendly websites that solve real-world problems. With over a year of experience, I've built and maintained modern web applications, focusing on performance, accessibility, and clean code. I'm comfortable working with databases, networks, and modern web technologies, and I enjoy making complex technical ideas easy to understand for people from all backgrounds. What sets me apart is my ability to balance strong technical skills with a deep understanding of user needs and business goals. Whether it's debugging code, optimizing performance, or collaborating on new features, I thrive in fast-paced environments and love the challenge of juggling multiple projects to deliver great results.

EDUCATION

Federal University of Ilorin Kwara– Kwara State, Nigeria.   *October 2018 – November 2024*
Bachelors of Arts

PROJECTS

Github: https://github.com/Pogbayo

EXPERIENCE

AWS APAC Solutions Architecture virtual experience program on Forage   *April 2022*

- Designed a simple and scalable hosting architecture based on Elastic Beanstalk for a client experiencing significant growth and slow response times.
- Described my proposed architecture in plain language ensuring my client understood how it works and how costs will be calculated for it.
- Designed and maintained API's fetching billions of data points related to patient health information resulting in continuous availability for customers.

HUMAN RESOURCES ASSOCIATE- *NESTLE NG*   *July 2024 - November2024*

- Communicating with clients and customers to understand their needs and provide relevant economic insights.
- Explaining economic trends and their potential impact to customers of various backgrounds.
- Staying updated on the latest economic trends, theories, and methodologies.
- Attending conferences, workshops, and training sessions to enhance skills and knowledge
- Gathering and analyzing data from various sources, including economic indicators, financial reports, and market surveys.

APEX BEE   *April 2024 - October 2024*

- Provided expert technical support and guidance for web-based applications, assisting clients in navigating and utilizing their platforms effectively while addressing their specific needs.
- Analyzed and troubleshoot complex user-reported issues using diagnostic tools and techniques, identifying root causes, and implementing tailored, effective solutions.
- Oversaw the development, deployment, and optimization of web applications, ensuring they are secure, scalable, and performant to meet both user expectations and business requirements.

- Continuously enhanced the reliability and functionality of web applications, prioritizing user satisfaction and delivering seamless performance across various platforms.
- **Collaborated with cross-functional teams** to design and implement tailored **web development solutions** that meet specific client needs, enhancing user experience and functionality across their websites and applications.
- Developed and maintain **technical documentation**, including **developer guides, API documentation, and troubleshooting procedures**, to support internal teams and improve client understanding of the web solutions provided.
- Led **training sessions and workshops** for clients and team members on best practices for web development tools and frameworks, fostering greater understanding and effective utilization of modern web technologies.
- Monitored **website performance and user feedback** to identify areas for improvement, recommending enhancements to **UI/UX designs, workflows, and codebase** to optimize functionality and user engagement.
- Assisted in **migrating client websites and data** to modern platforms or content management systems, ensuring data integrity and minimal disruption to business operations during the transition process.

VOLUNTEER

Volunteer Human Development Community Project -   *August - December 2022*

Federal University Of Ilorin Kwara

- Led a team of students and local community members to design and implement **sustainable practices** that promoted improved resource management and enhanced quality of life within the community.
- Conducted **field assessments** to identify key challenges faced by individuals, such as access to education, health services, and economic opportunities, and developed tailored solutions based on research and best practices in **human development strategies**.
- Organized and facilitated **workshops and training programs** for community members, focusing on topics like resource management, skill-building, and eco-friendly practices, resulting in a 30% increase in awareness and adoption of sustainable development practices.
- Partnered with **local NGOs and organizations** to secure funding and resources for community-driven initiatives, enhancing the capacity for education, healthcare, and socio-economic development within the region.
- Collected and analyzed data on **household income, education levels, and overall well-being** before and after implementing recommended practices, presenting findings to stakeholders to demonstrate the project's impact on **human development and community resilience**.

GLOBAL CLEANUP DAY-   *21st of September 2023*

Idumota Lagos Island, Nigeria

- Participated in a local environmental clean-up campaign, mobilizing community members to address litter and waste management issues in Idumota Market.
- Collaborated with local volunteers and organizations to organize the event, which engaged over 100 participants in cleaning efforts and raising awareness about the importance of environmental sustainability.
- Led educational sessions on waste segregation and recycling, emphasizing the impact of plastic pollution on local ecosystems and communities.
- Collection of litter, contributing to a cleaner market environment and promoting healthier community practices.
- Developed post-event feedback surveys to assess community engagement and identify areas for future environmental initiatives.

CERTIFICATIONS

- AWS Certified Cloud Practitioner   *February 2023*
- Freecodecamp Front-end Web developer   *November 2023*
- **Front-End Engineer Career Path**   March 2024

KEY SKILLS

- **HTML**
- **CSS**
- **JS**
- **BOOTSTRAP**
- **REACT**
- **MONGODB**
- **TYPESCRIPT**
- **NEXTJS**
- **NODEJS**
